

Sign In App®

The smart and safe way to sign in

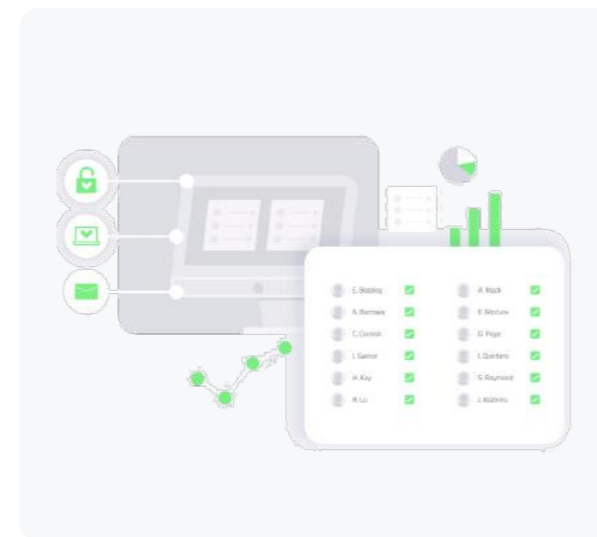

for schools and
colleges

Simply ideal for schools and colleges

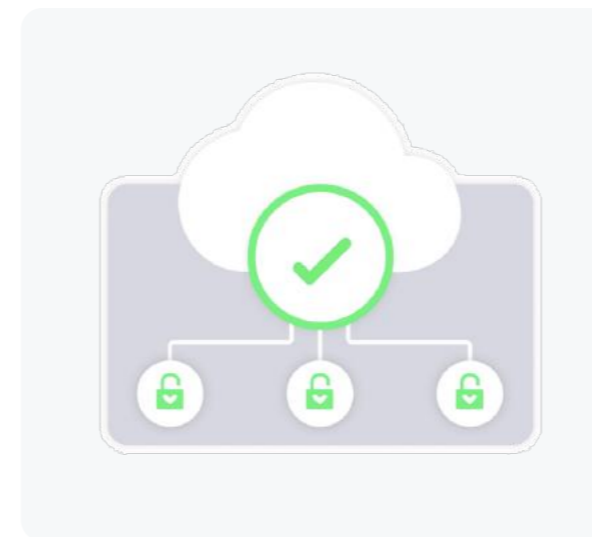

With a variety of features tailor-made to improve visitor management on education sites, Sign In App is perfect for schools and colleges.

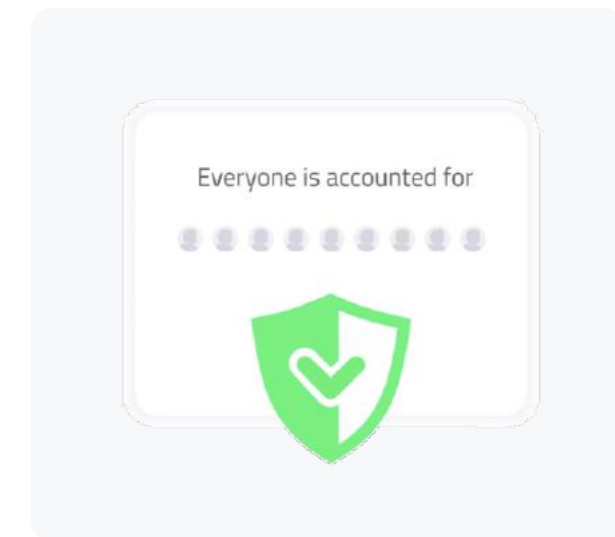

Sign in quickly from an iPad, smartphone, QR or RFID.

Keep attendance records easily, safely and accurately.

Easily comply with regulations and safeguarding policies with all data stored securely.

Ensure everyone is accounted for in the event of an emergency.

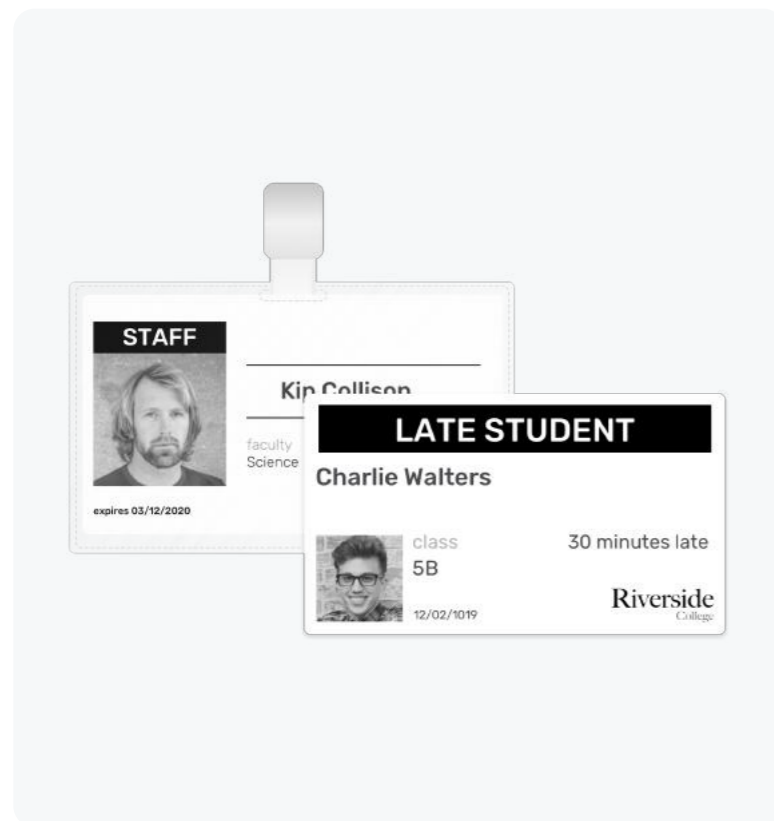

Supporting a safe return to schools and colleges

Safety always comes first. We provide tools to help our Sign In App community protect guests, employees and students, all at no extra cost.

- Contactless sign in options
- Contact tracing
- Site capacity notifications
- Health questionnaires on arrival
- Reserve desks and meeting rooms

Configure Sign In App to suit your school

Configure groups to manage each of your different types of visitor. The sign in process can be customised for each group type to provide a streamlined experience.

Add custom data fields and tailor them to each type of visitor, giving you total control over the sign in experience and the data gathered (critical for data regulations).

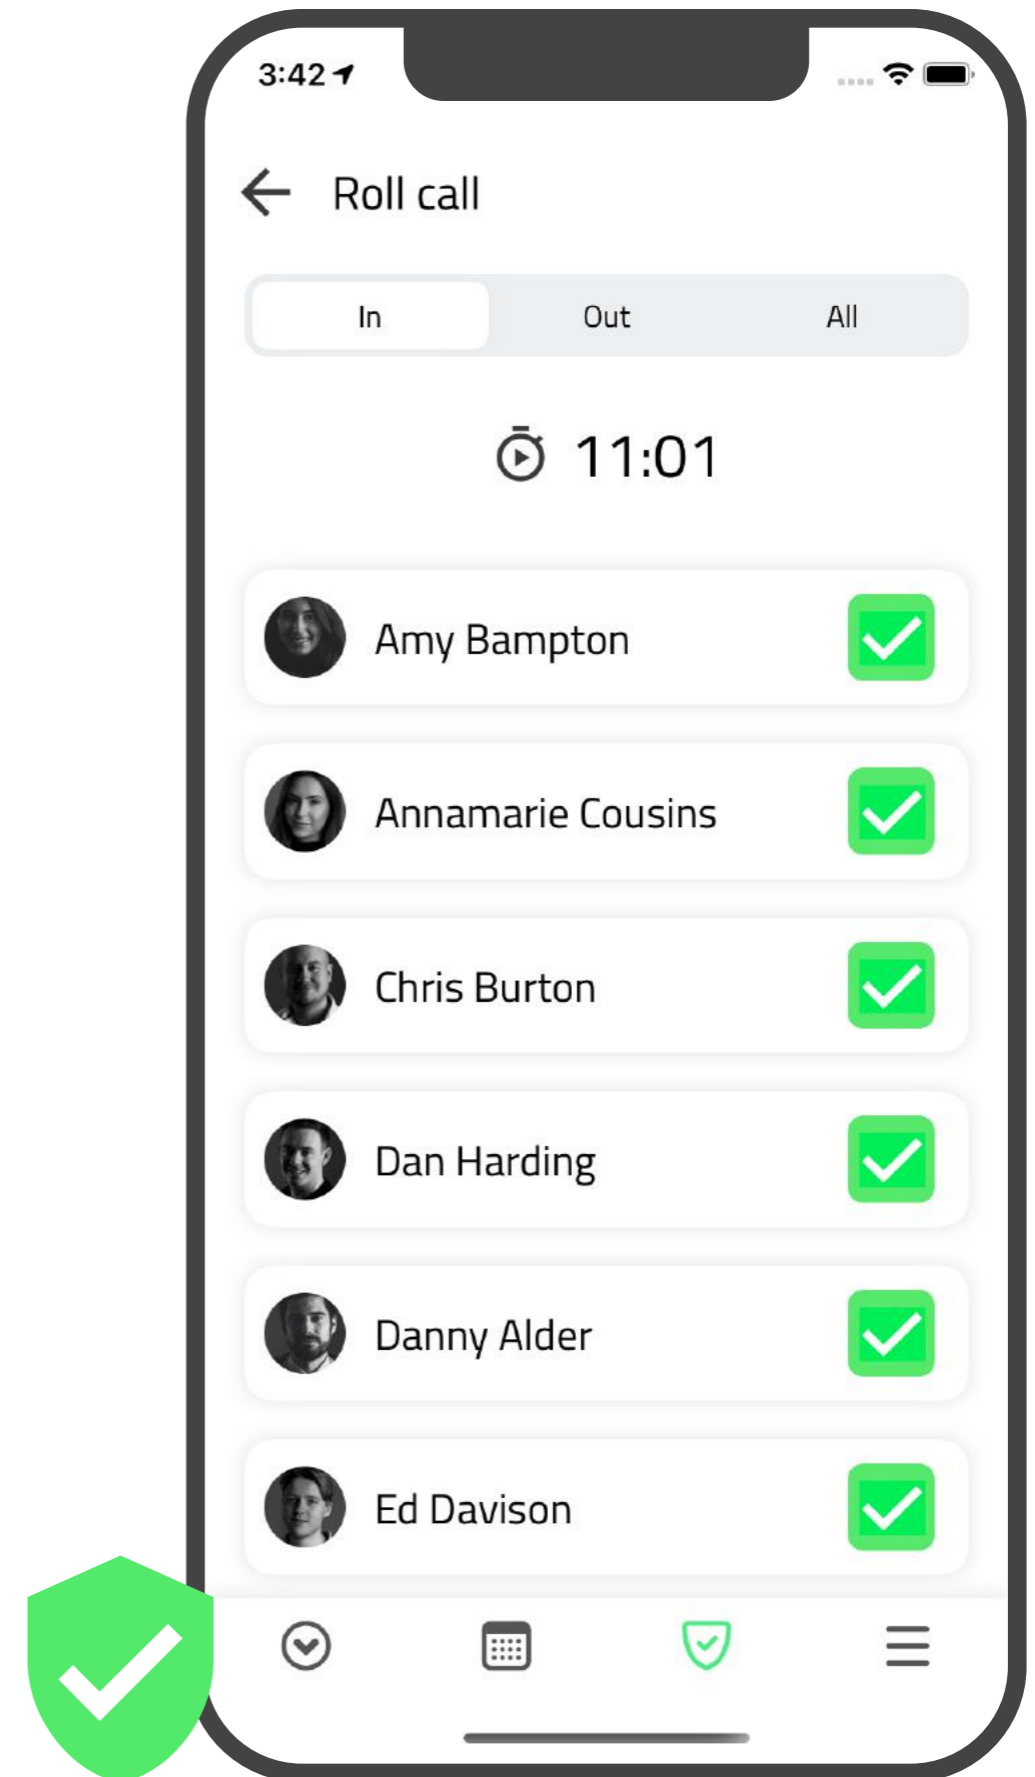

Ensure both visitors, employees and students read and accept important information such as health & safety notices plus safeguarding and privacy policies.

Ensure the safety of everyone on site

Evacuation lists can save lives. Nothing is more important than the safety of everyone on site. With Sign In App, no one is left behind.

- Access from anywhere
- Create timed evacuation reports
- Assign evacuation points with maps
- Improve safety of visitors, teaching employees and students

Sign in with your door access fobs and cards

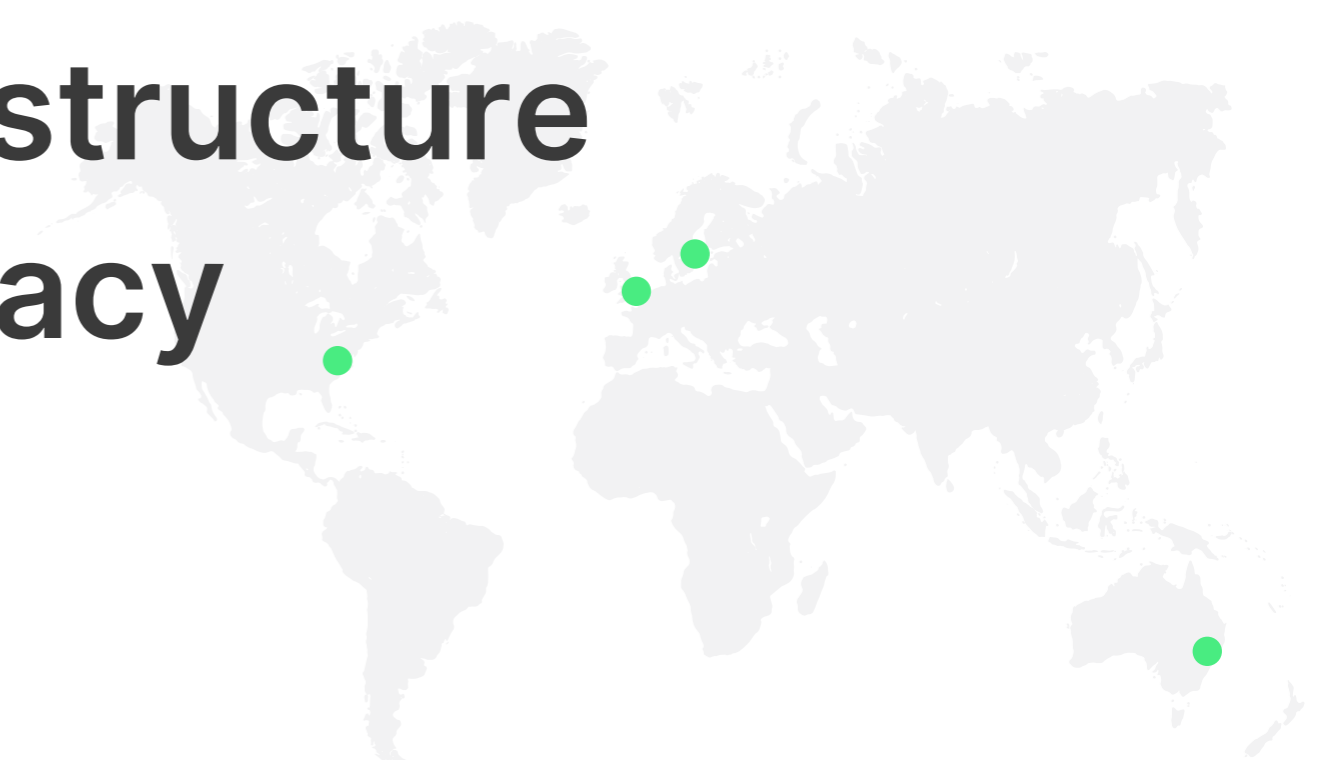

With one tap, employees can easily and securely sign in and out, simplifying the process and saving time for you and your team members.

- Compatible with almost all RFID tags
- Attaches to our enclosures
- Connects via Bluetooth BLE
- Simple upgrade for US\$325 when purchased with a compatible stand

A secure, global infrastructure built around data privacy

Sign In App is committed to ensuring the security of your data. We are data compliant and ISO27001 certified for Information Security Management.

Data retention options built in for total control of your data.

Auto-scaling infrastructure hosted in Tier 4 data centres.

Choose to store your data in one of four global regions.

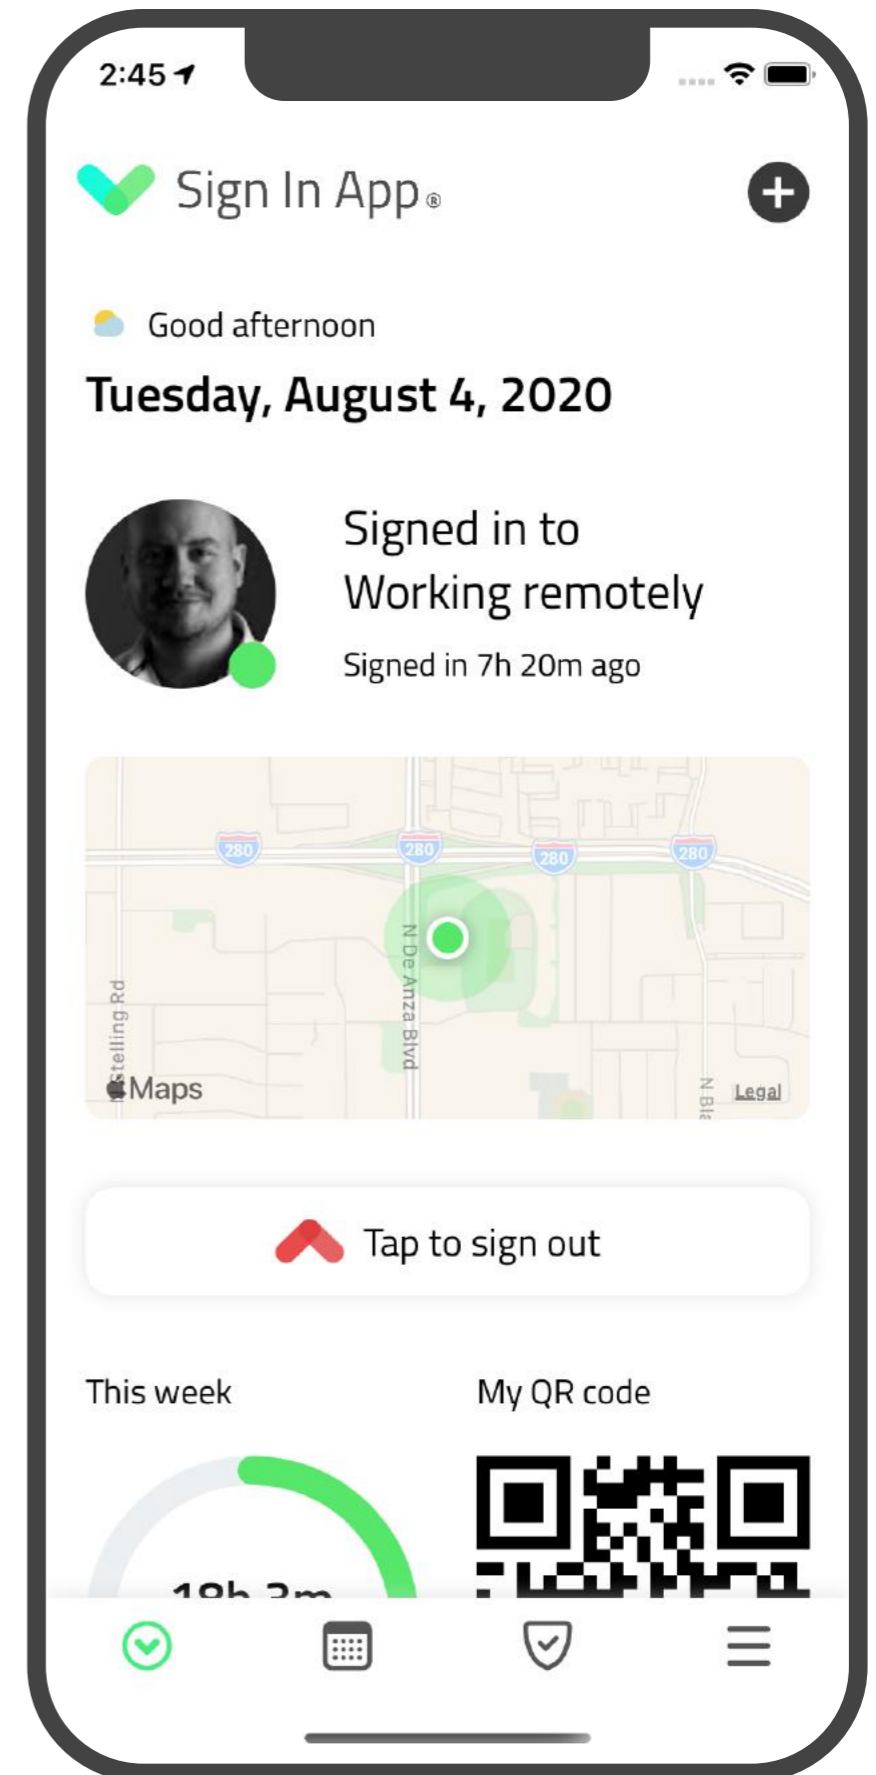

Built for high availability - 99.99% uptime in 2020.

Free companion app for smartphones

Available on iPhone and Android. Employees can sign in from their phone, run evacuation reports, pre-register guests and book spaces.

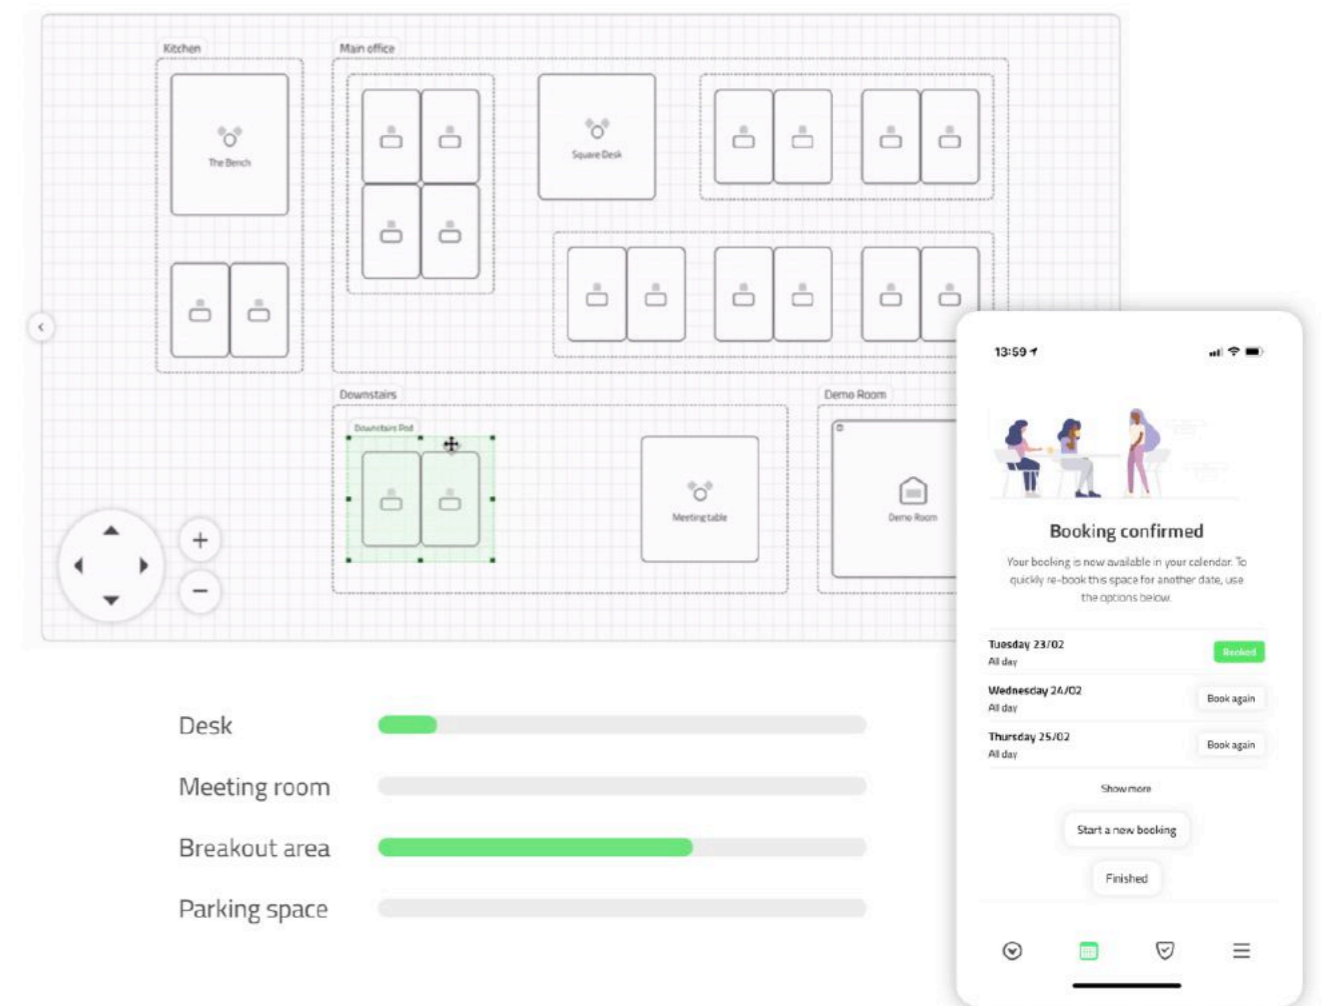

- Sign in when on site or working remotely
- Auto sign in when you arrive **BETA**
- Create and time evacuation reports
- View sign in history and hours
- Book desks and meeting rooms

The smart way to reserve desks and meeting rooms NEW

Embrace the hybrid workforce and manage reduced site capacity with Spaces - smart and flexible desk and meeting room reservations.

- Make any space bookable
- Reserve spaces from your phone
- Recreate layout or upload a floor plan
- Free for the first 12 months*

*First 12 months free, if activated in 2021. After 12 months, Spaces will be priced at US\$150 per site annually.

Case Study: Green Templeton College

Green Templeton College is a graduate community at the heart of the University of Oxford and strives towards its commitment to academic excellence. It brings together students, academics, and practitioners with a particular focus on business and management, health and medicine, and social sciences. With over 650 students and 80 university staff, as well as numerous suppliers and visitors potentially on site at any one time, Green Templeton College wanted to address community welfare and security by modernising its visitor management solution within its traditional Oxford setting.

Despite its wide range of accommodation and facilities, Green Templeton College did not have a visitor management system in place which was causing an array of challenges, such as the visibility of contractors on site and which staff

members were present around campus. As such, the College was looking to deploy a streamlined and secure system to keep track of all personnel on site and remove the opportunity for anyone to access the College's facilities that could pose a concern for those remaining on campus. Daniel Cooper, residential lodge manager, Green Templeton College comments: "When I started out in the position of Lodge Manager, I was very surprised that there was no stringent visitor management solution available so it was my priority to implement a robust solution as soon as possible. As a duty of care for the College, it is imperative that the array of people accessing the facilities always remain safe and secure. The solution from Sign In App provides a seamless way for the College to manage everyone allowing them to sign in and out via the portal placed at reception

or more conveniently by the ease of the downloadable app, ensuring that everyone – regardless of student, staff, or visitor – adheres to the same protocols." Initially, Green Templeton College deployed Sign In App primarily to understand the whereabouts of students and staff when it came to routine fire drills – to observe if they were signed into the building or not. Previously there was no way of quickly and accurately understanding how many individuals were on campus so it was routine to check all the hallways and communal rooms to ensure that everyone had evacuated quickly – a potentially

dangerous exercise in the event of an actual incident.

With the onset of Covid-19, tighter requirements and controls were implemented by Green Templeton College which relied on using Sign In App in a smart and robust way to ensure that regulations were adhered to within the overall setting. Quickly and efficiently, the College was able to target students at sign in stages and prompt them with a pre-populated health questionnaire allowing the College to keep a track and trace system and the virus at bay. In real-time, the College is able to use the array of visual dashboards and records to see who has signed in and

out – particularly useful in the event of a fire evacuation. Furthermore, management has the opportunity to drill down at a granular level and view individual responses to questionnaires, and are able to flag any results that could be a concern, such as if someone is declaring any Covid-19 systems.

Another area of deployment where Sign In App has generated insight is monitoring who accesses the health and fitness facilities – enabling the College to understand who is a repeat user or visiting for the first time. Using the system here negates the need for any paperwork and

ensures that students using the gym equipment have adhered to the waiver and gym rules prior to use. Cooper continues, “The biggest hurdle was getting senior management to embrace this period of change as they had initial fears that having a technology-based system in place could be overwhelming and questioned whether it could be adequately maintained. As I was able to explain the benefits of implementing a visitor management system and the multitude of problems it would overcome – any queries were quickly addressed and the tool rapidly set up. Collectively within

the College, we've set the standards high and many other facilities are looking at rolling this out too which is great to hear. From me, the key takeaways are how versatile the whole system can be and the level of functionality and reporting which is accessible for my role – such reporting requirements have been understandably exacerbated throughout Covid and ensures that duty of care is put first!"

Dan Harding, co-founder, and CEO of Sign In App comments: "Despite the difficulties the last year has presented to the education sector, it's been great working with institutions like Green Templeton College that are tackling these challenges head-on. With our out-of-the-box solution, fit for any industry and market, visitors – or in this case primarily students and staff – can log in and out at a tap of a button ensuring that safety and welfare are prioritised. Without a doubt, Covid has accelerated our product roadmap and it is evident that our solution is adaptable to everyone's changing needs: from its flexibility for Green Templeton College displaying health-related screening questionnaires, the hybrid workforce, or visitor management of facilities and accommodation."

Cooper concludes: "For us, Sign In App's greatest achievement has been the proactivity portrayed across their staff within the various teams – from Sales to Onboarding. They are always easily approachable, and whenever I have a question or suggestion they are always happy to listen to my ideas from a user of the tool and how the system can be enhanced later down the line. "In a nutshell, Sign In App was transformational for the College before Covid, but it would be impossible to imagine not having it during and post-pandemic. I would thoroughly recommend taking the approach to all other educational institutions."

**Proud to be trusted by schools, colleges,
universities and trusts across the world**

Included in your site subscription

Contactless sign in

Sign in safely and securely
