About us

Since 2014, Sign In App has been helping organizations rethink what visitor management can be.

We're always looking ahead - continuously investing in new ways to help organizations strengthen security, simplify compliance, and create better experiences for every visitor, employee, and contractor.

By bringing together security, compliance, and human experience, we're helping shape the future of Access Intelligence - giving organizations the visibility, confidence, and control they need, without losing the human touch.

The category has traditionally focused on one question: Who is in the building?

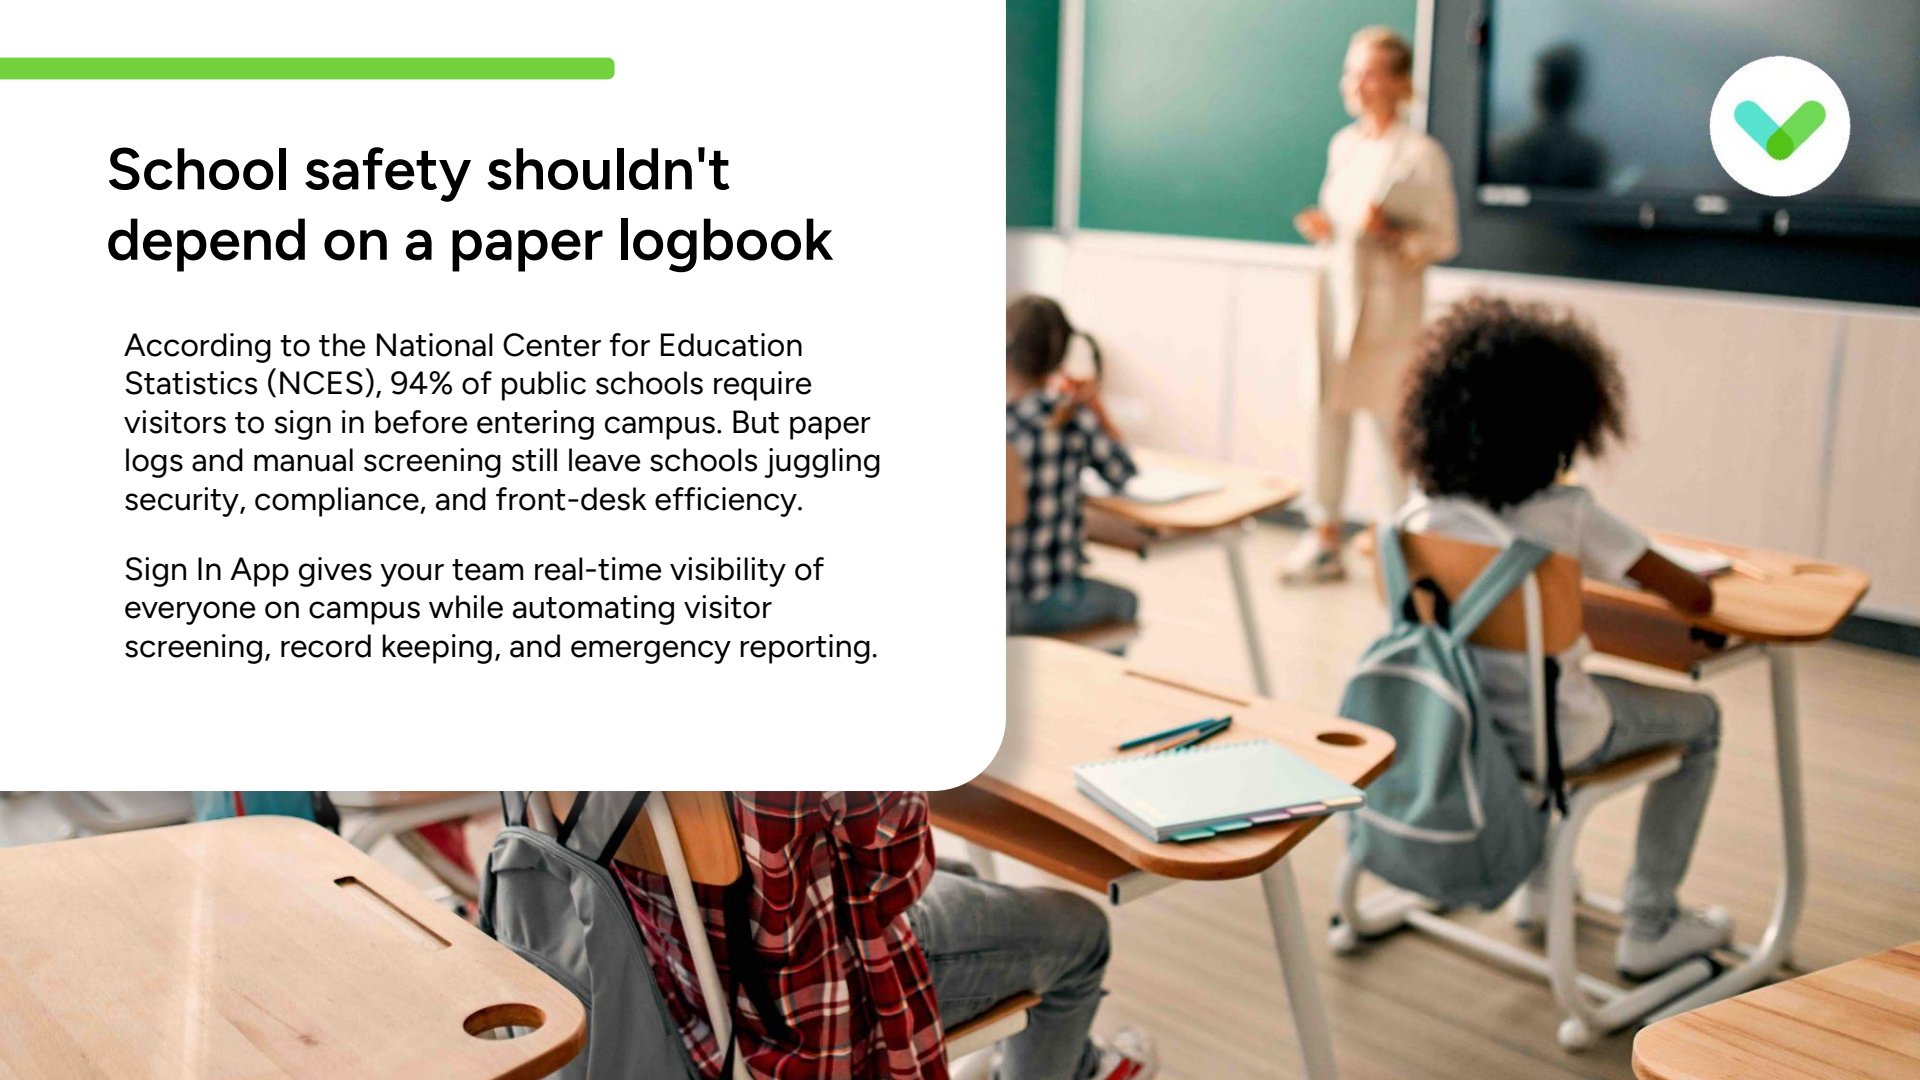

Sign In App answers more: Who is entering the organization, should they be there, what does it mean, and what should happen next?

Secure by design
Human by nature

School safety shouldn't depend on a paper logbook

According to the National Center for Education Statistics (NCES), 94% of public schools require visitors to sign in before entering campus. But paper logs and manual screening still leave schools juggling security, compliance, and front-desk efficiency.

Sign In App gives your team real-time visibility of everyone on campus while automating visitor screening, record keeping, and emergency reporting.

**Screen visitors against sex offender registries,
maintain real-time visibility, and access accurate
evacuation reports - all from one easy-to-use platform.**

Sign In App helps K-12 schools and districts replace paper visitor logs with a modern school visitor management system that improves campus security, simplifies compliance, and reduces administrative workload.

One platform. Four connected layers for safer, smarter schools.

Smart visitor management

Always know who is arriving and why, before they step through the door.

Verify visitors, contractors, volunteers, and parents at every entry point, while keeping sign-in simple, fast, and welcoming.

Seamless workplace experience

Desks, rooms, and routes that keep people moving.

Help staff, students, and visitors move through the day with less friction, fewer delays, and less pressure on reception and facilities teams.

Adaptive compliance & risk management

Keep the right checks, records, and approvals working quietly in the background.

Automate routine processes, maintain accurate audit trails, and help every school, college, or campus stay ready for inspections and reviews.

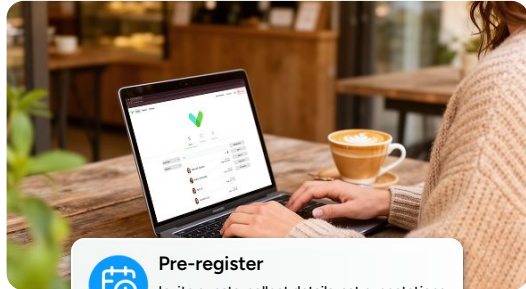

Predictive safety & emergency response

Be ready for anything and keep people safe.

Use live presence data to support evacuations, account for visitors and contractors, and give response teams the information they need to act quickly and confidently.

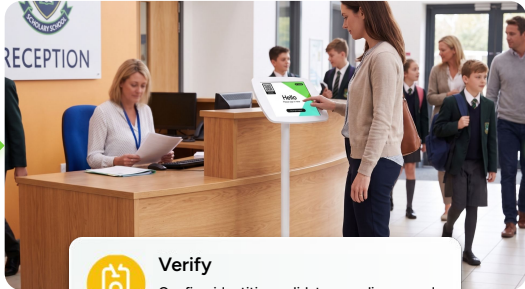

Safer schools start with better access intelligence. Knowing who's on site, why they're there, whether they should be there, and what needs to happen next.

From arrival to action

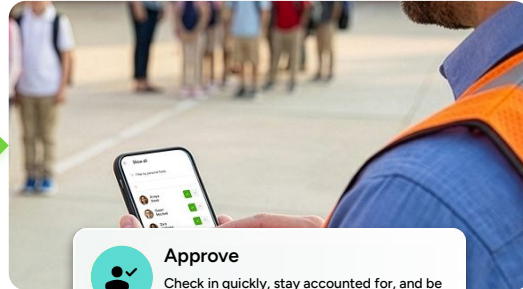

Pre-register

Invite guests, collect details, set expectations, and prepare the visit before anyone arrives.

Verify

Confirm identities, validate compliance, and ensure the right people have the right access.

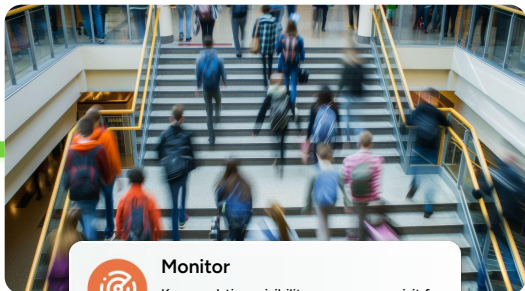

Approve

Check in quickly, stay accounted for, and be ready when it matters most.

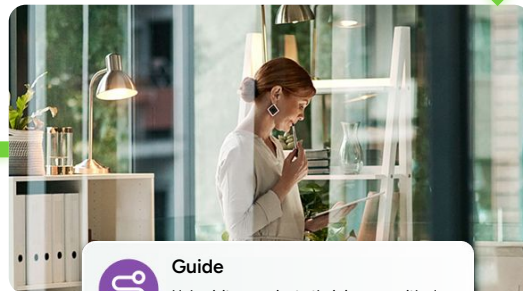

Review

Turn every visit into actionable insight with complete audit trails, reporting, and analytics.

Monitor

Keep real-time visibility across every visit for safer, faster decisions

Guide

Help visitors navigate their journey with clear directions, notifications, and seamless access.

Built for every size of *school*

Individual schools

Fast to deploy, simple to manage, and designed for busy school teams.

School districts & growing schools

Standardize across multiple schools while allowing local flexibility.

Colleges and universities

Manage visitors, events, contractors, and campus operations across multiple buildings with confidence.

Large and complex campuses

Handle high visitor volumes, strengthen campus safety, and stay in control across every site.

From a single school to a statewide district or university campus, Sign In App brings visitor management, campus safety, compliance, and emergency response together in one connected platform.

AI for today, tomorrow & beyond

We're building intelligent capabilities that help you stop the threat, protect your data, and confidently manage the evolving needs of today's workplaces.

Companion Assistant

Sign In App Companion Assistant streamlines daily tasks like booking desk, rooms and resources.

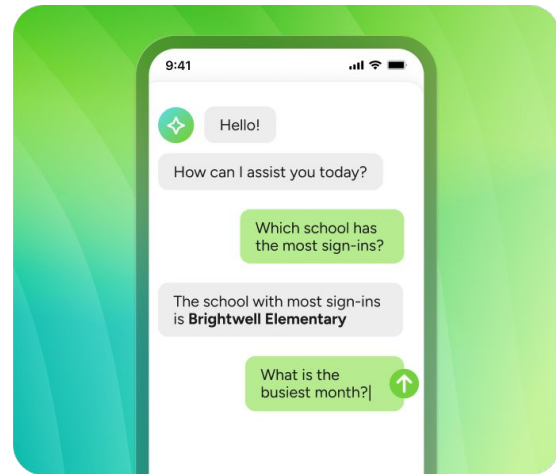

Analytics Assistant

Our enterprise platform's Analytics Assistant surfaces real-time insights, helping spot trends & potential risks.

Appointment scheduling

AI-powered appointment scheduling handles visitor communication, reminders, assistance, and reporting.

And we're only getting started

The next generation of AI will do more behind the scenes - removing friction, surfacing timely insights, and making the platform feel as natural as a conversation. It helps your team move faster with less administration and greater confidence, while keeping people at the center of every decision.

Our data security commitments

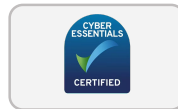

Data security and controls you can count on

Protecting visitor, employee, and student data is built into everything we do. Sign In App combines independently audited security controls, resilient cloud infrastructure, and compliance-focused workflows to help schools, districts, and higher education institutions operate with confidence.

- **Protect sensitive data:** End-to-end encryption, role-based access, and configurable data retention policies help you stay in control.
- **Your data, your policies:** Configure retention periods to meet your organization's requirements.
- **Built for reliability:** Auto-scaling cloud infrastructure designed for performance, resilience, and 99.9% uptime so your campuses stay connected and your front office keeps moving.
- **SOC2 Type II and ISO 27001 Certified**

Choose to store data in one of 6 global regions

Customer success

Over **6,000 schools, colleges & universities** across the globe **trust Sign In App** to streamline their visitor management processes and secure their campuses.

"We had the unfortunate experience of having to be evacuated due to the LA wildfires. I cannot express enough how, because we had Sign In App, we we prepared for that situation and could effectively evacuate everybody off campus. So thank you. You actually did save lives."

- **Lanai Road Elementary School, LA USD**

"It's certainly much more reliable than the old pen and paper system, and with a primary responsibility for the safety of our staff and students, it's really great to know that there's no one ever on campus unaccompanied that hasn't been pre-vetted. It makes check-in smooth and helps us keep good records."

- **OneSchool Global**

"Sign In App provides a seamless way for the College to manage everyone allowing them to sign in and out via the kiosk at reception or by the ease of the Companion app, ensuring that everyone – regardless of student, staff, or visitor – adheres to the same protocols."

- **Green Templeton College, University of Oxford**

Smart visitor management

Everything you need to keep schools secure, welcoming, and running smoothly.

Pre-registrations & invites

Send branded invites, collect visitor information in advance, and make every arrival faster.

Physical access control integrations

Connect visitor management with existing access control systems to strengthen security & simplify entry.

Visitor approvals & risk insights

Approve visitors with confidence using real-time risk and compliance checks.

ID scan & identity verification

Verify identities at every entrance with ID scanning, identity verification, and sex offender registry checks.

Mobile & kiosk sign-in

Give visitors flexible sign-in options, from self-service kiosks and Sign In Points to mobile check-in.

Branding & localization

Create a sign-in experience that reflects your school or district and supports multiple languages.

Notifications

Notify hosts when visitors arrive and ensure the right people have the information they need.

Appointments

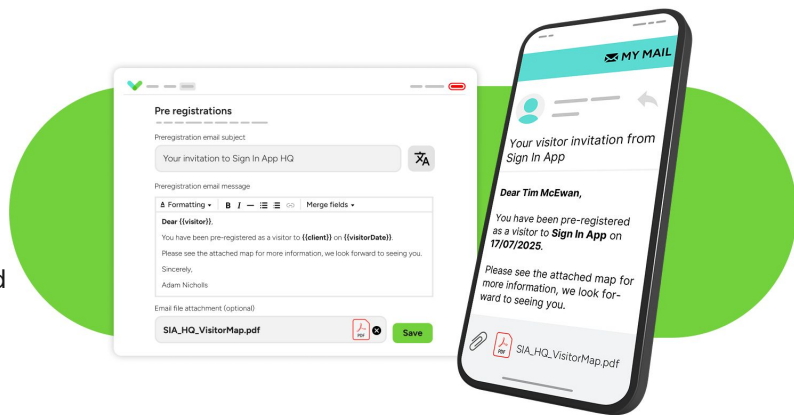

Keep visits organized with simple appointment scheduling and host visibility.

Visitor pre-registrations & invites

Collect the right information and prepare every visitor before arrival.

- **Branded visitor invitations**
 - Send personalized invitations with QR codes, calendar links, and branded messaging that set the tone before arrival.
- **Registration Portal**
 - Collect documents, safety acknowledgements, and required information before visitors arrive, reducing reception delays.
- **Flexible approvals & workflows**
 - Route visitors through configurable approvals, compliance checks, and pre-arrival requirements based on risk, role, or location.
- **Fast, contactless sign in**
 - Visitors scan their QR code on arrival, with details pre-filled for a seamless check-in experience.
- **Real-time visibility**
 - Know who's expected, track arrivals, and keep reception teams prepared with live visitor insights.

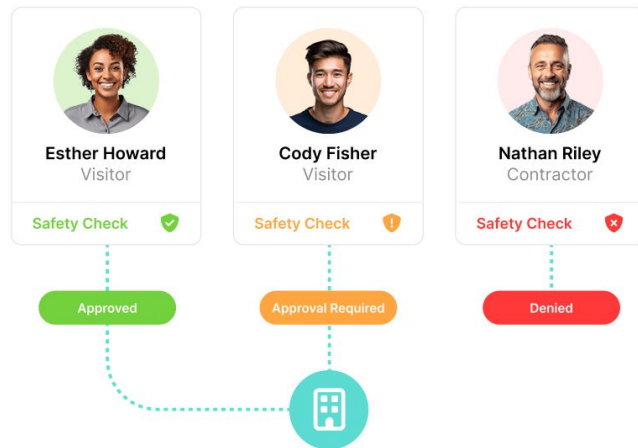

Visitor approvals & risk insights

Know who's coming and make informed decisions before they arrive.

- **Advance information gathering**
 - Registration portal capabilities that capture essential visitor details and compliance requirements before arrival
- **Simple approval workflows**
 - Approve visitors in advance with flexible workflows that match your district's or campus's security policies.
- **Watchlist & sex offender screening**
 - Automatically screen visitors against custom watchlists and registered sex offender databases before they arrive on campus.
- **Identity verification**
 - Verify visitor identities before arrival to help ensure only approved visitors gain access.
- **Flagged visitor alerts**
 - Alert the right staff when a visitor is flagged, so potential concerns can be reviewed before access is granted.

ID scan & identity match

Capture and validate ID details quickly at sign-in.

- **Government ID scanning**
 - Scan government-issued IDs to capture accurate visitor information and reduce manual data entry.
- **Identity verification**
 - Compare ID details and visitor photos to confirm identities and flag discrepancies instantly.
- **Flexible security checks**
 - Apply ID scans, photo capture, and spot checks based on visitor type, location, or security requirements.
- **Seamless sign-in workflows**
 - Build ID verification into any sign-in journey without slowing arrivals or disrupting the visitor experience.
- **Watchlists & blocklists**
 - Automatically screen visitors against internal watchlists and blocklists to identify higher-risk individuals before access is granted.

ID scan with sex offender checks

(North America only)

Verify visitors in real time with ID checks against the North American sex offender registry and internal watchlists - plus provide a risk score before approving sign ins.

Our Education bundle includes one license and additional licenses are \$20 per kiosk per year

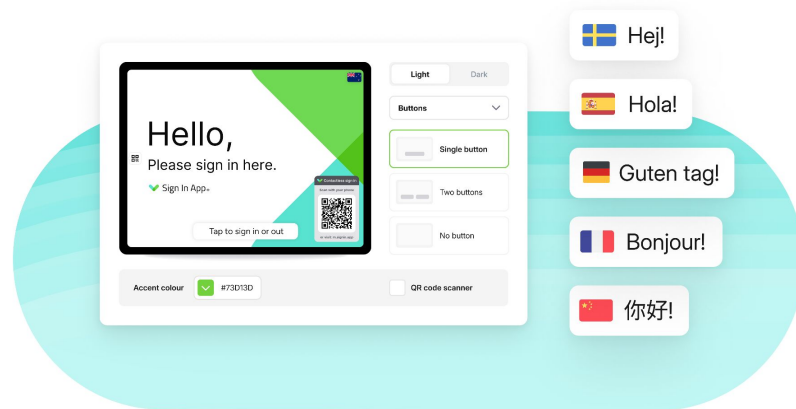

Branding & localization

Deliver consistent, multilingual experiences at every touchpoint.

- **Branded visitor journeys**
 - Deliver a seamless experience with branded invitations, kiosks, badges, emails, and notifications.
- **Multilingual experiences**
 - Support 20+ languages across sign-in, visitor communications, and online portals for global accessibility.
- **Localized content**
 - Translate custom fields, policies, group names, and site messaging to meet the needs of different communities.
- **Centralized brand management**
 - Apply logos, colors, templates, and messaging across every school or campus from one platform.
- **Site-level flexibility**
 - Adapt sign-in experiences, messaging, and visitor requirements for each school or campus while maintaining consistency across your organization.

Notifications

Keep the right people informed, at the right moment.

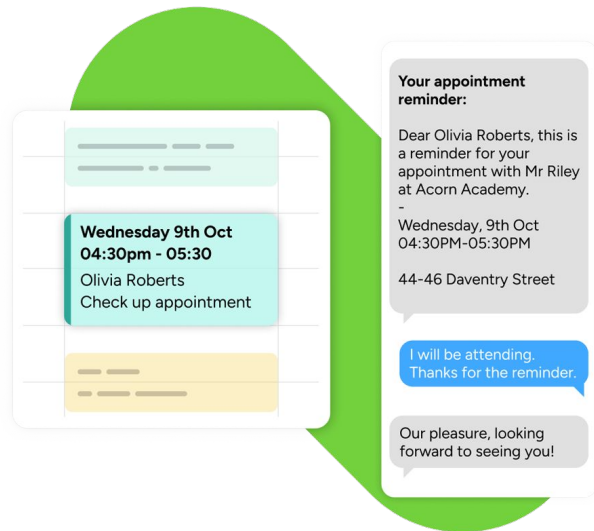

- **Instant arrival alerts**
 - Hosts are notified the moment a visitor signs in for a prepared, personal welcome.
- **Multi-channel delivery**
 - Reach hosts through SMS, email, Teams, Slack, or push notifications so guests aren't left waiting.
- **Team-wide coordination**
 - Automatically notify assistants, security, or facilities, with Entra ID and Google sync keeping contacts accurate.
- **Smart, rule-based alerts**
 - Trigger alerts for VIPs, compliance issues, or flagged activity using powerful, flexible notification rules.
- **Emergency notifications**
 - When an evacuation starts, instantly notify everyone signed in at your site via Companion app push notifications.

Appointment scheduling

Make every school or campus visit easier to manage, from booking to arrival.

- **24/7 self-service booking**
 - Let parents, prospective students, visitors, and contractors book, reschedule, or cancel appointments without adding to your team's workload.
- **Automated confirmations & reminders**
 - Reduce missed appointments with automatic confirmations, reminders, and updates that keep visitors informed before they arrive.
- **Real-time calendar coordination**
 - Sync staff calendars and availability to prevent double bookings and simplify scheduling across schools, departments, and campuses.
- **Better prepared visits**
 - Collect important details in advance, so staff know who's coming, why they're visiting, and what they need.
- **Complete appointment visibility**
 - See upcoming bookings, attendance, cancellations, and appointment history in one place, giving front office teams and staff a clear view of every visit.

Sign In App Tap

Use RFID access cards and fobs to automate staff sign-in alongside your existing door access control system.

How it works

1

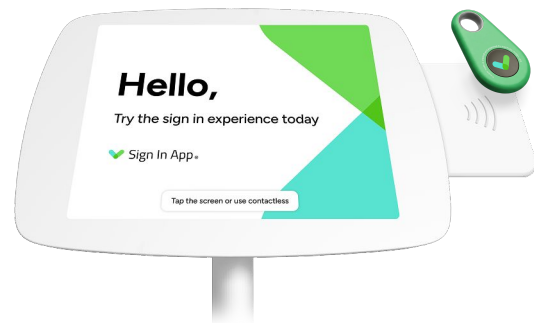

Install the Sign In App Tap reader on your Sign In App stand

2

Map staff to their access card number (one-time setup)

3

Tap card to the kiosk reader to sign in and out seamlessly

Combining Sign In App Tap and door access control gives you an always accurate, auditable record of who was on site.

Compatible with:

brivo

Genetec

LENEL S2

Paxton

nedap

SALTO

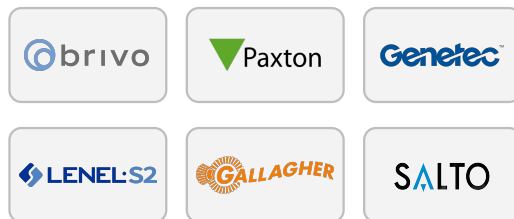

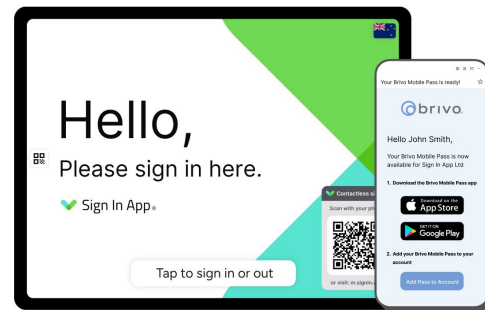

GALLAGHER

Access control integrations

Connect visitor management with your existing physical access system.

- **Temporary visitor credentials**
 - Automatically issue temporary access credentials to approved visitors through supported access control integrations.
- **Access permissions**
 - Grant the right level of access based on visitor type, destination, or approved workflow, helping ensure visitors can only access the areas they need.
- **Automatic access deactivation**
 - Remove temporary access automatically when a visit ends or expires, reducing manual administration and improving security.
- **Connected audit trails**
 - Keep visitor activity and access events aligned to create a complete record for reporting, investigations, and compliance.
- **Multi-site access management**
 - Apply consistent visitor access policies across multiple locations while integrating with your existing access control systems.

[See all integrations](#)

Seamless workplace experience

Transform the employee workplace experience.

Staff sign in

Know who's on-site with fast, reliable staff sign-in across every location.

Sign In Companion

Give employees a faster, more connected workplace experience from their mobile device.

Sign In App Tap

Enable secure access and sign-in using RFID cards, fobs, and mobile credentials.

AI Assistant

Get answers, automate tasks, and save time with built-in AI assistance.

Platform customization

Adapt workflows, branding, and settings to fit the way your school/district works.

Integrations and API

Connect Sign In App to the tools and systems your team already uses.

Time & Attendance

Track working hours accurately without adding administrative overhead.

Desk, room & resource booking

Make better use of school spaces and resources with simple booking for rooms, facilities, clubs, events and more.

Staff sign-in

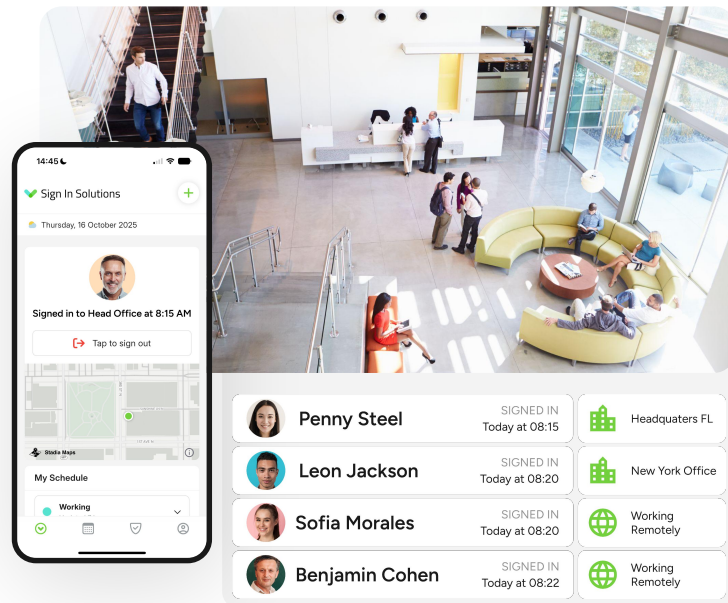

Simple, reliable sign-in for staff across every school and campus.

Sign In App makes it easy to record staff attendance across schools, districts, and campuses. Whether staff work at one school or move between locations, sign-in is quick and consistent. Accurate, real-time records give you a clear picture of who's on campus and help account for everyone during an emergency.

Multiple ways to sign in:

- Sign In Companion (Available on iOS, Android & Web)
- RFID reader
- Kiosk
- QR code

With Sign In Companion, employees can sign in from their phone/desktop, manage bookings and visitors, receive emergency evacuation alerts, and confirm they're safe during an incident.

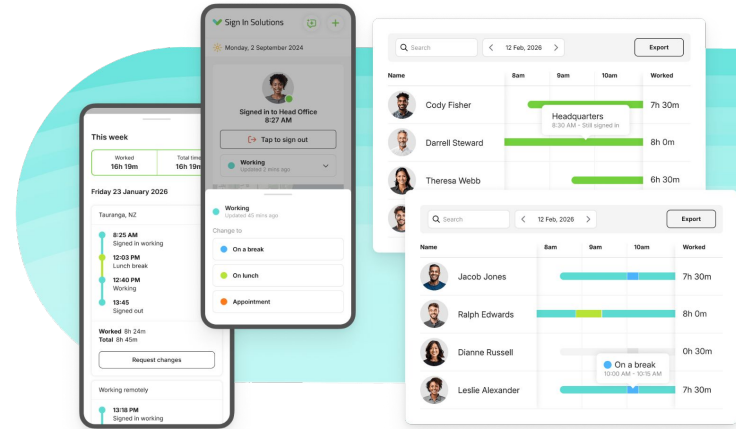

Time & Attendance tracking

Accurate staff time and attendance that supports payroll, safety, and compliance.

- **Automated hours & timesheets**
 - Track working hours and automatically create accurate timesheets across schools, campuses, and teams.
- **Activity & status tracking**
 - Record working time, breaks, and custom activities to give teams a clear view of staff hours.
- **Working patterns, shifts & rules**
 - Set expected hours, shifts, break rules, and schedules for teachers, support staff, facilities teams, and other employees.
- **Absence and leave tracking**
 - Record absences, leave, and punctuality against expected schedules in one place.
- **Reporting & payroll-ready exports**
 - Create payroll-ready exports and reports across individual schools or your entire district.

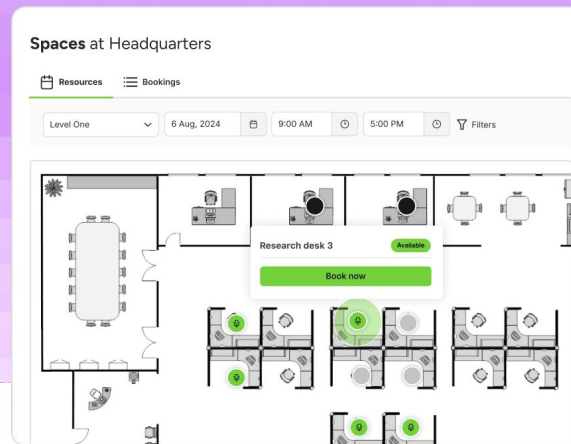

Spaces - desk, room & resource booking

Make better use of school and campus spaces with simple, flexible booking.

- **Flexible space & resource booking**
 - Make classrooms, meeting rooms, athletic facilities, equipment, parking, and other shared resources easy to find and book.
- **Interactive floor plans**
 - Upload or create floor plans that help staff see where spaces and resources are located before they book.
- **Smart booking rules**
 - Set availability, capacity limits, buffer times, and booking rules to match how each space or resource is used.
- **Search, filters & controls**
 - Help staff quickly find the right space or resource, with permissions for different teams, departments, schools, or campuses.
- **AI-powered Companion Assistant**
 - Find and book available spaces without searching through calendars or switching systems. Just ask the Assistant and get on with your day.

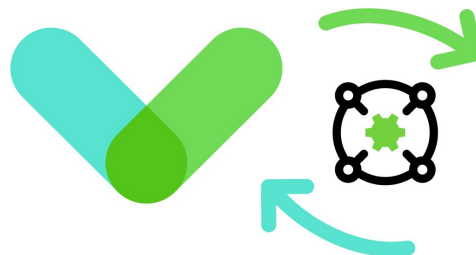

Integrations & API

Connect Sign In App with your SIS and existing systems.

Sign In App integrates with the systems your school already relies on, including leading Student Information Systems (SIS).

Keep student, staff, and family data accurate and up to date without manual entry or duplicate records. Alongside integrations with Microsoft 365, Google Workspace, access control, and other key systems, Sign In App helps create a more connected, efficient school environment.

With ready-to-use integrations and flexible APIs, your teams can reduce admin, improve data consistency, and keep information flowing across the systems they use every day.

Note: some integrations vary by subscription plan or are charged as an additional cost.

School safety & emergency response

Turn preparedness into peace of mind.

Emergency evacuations

Account for everyone on-site with fast, accurate evacuation management.

Evacuation notifications

Deliver critical evacuation information instantly through push notifications and SMS.

Block/watchlists

Screen for individuals of concern before they enter your campus.

Host notifications

Notify staff instantly when visitors arrive or require additional security review.

Activity dashboard

See who's on site across sites in real time, helping your team respond quickly during day-to-day operations and emergencies.

Integrations & API

Connect with your SIS, Microsoft 365, Google Workspace, access control, and more.

Risk insights

Gain visibility into campus activity and identify potential risks before they escalate.

Sign In Companion

Give staff access to emergency information and campus updates wherever they are.

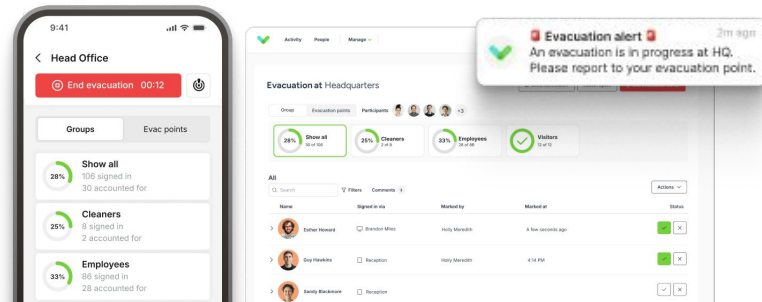

Emergency management

Respond faster. Protect your campus.

- **Live accountability**
 - Generate real-time evacuation lists and account for students, staff, and visitors across multiple devices.
- **Locate people quickly**
 - Find students, staff, or visitors, assign reunification areas, and identify anyone who still needs assistance.
- **Instant emergency notifications**
 - Send Companion push notifications and SMS to staff, visitors, and contractors in seconds.
- **Scenario-based emergency alerts**
 - Create custom alerts for lockdowns, evacuations, severe weather, active threats, and other campus emergencies.
- **Emergency reporting & compliance**
 - Capture every action with a complete audit trail to support incident reviews and compliance.

“ We were forced to evacuate our school, in a somewhat rapid manner, due to the LA wildfires earlier this year. Sign In App provided us with confidence that we had everybody safely off of campus. Sign In App actually did save lives.

- Lanai Road Elementary / LA USD

Risk & compliance management

The tools that help keep your campus secure and compliant.

Onboarding & credentials

Streamline onboarding for contractors, volunteers, and visitors while keeping credentials accurate and up to date.

Incident management

Capture, track, and resolve campus incidents with a complete audit trail.

Activity dashboard

Monitor who's on campus in real time and respond faster when it matters most.

Reporting

Turn visitor and campus activity into reports that support district policies and compliance.

Single sign-on (SSO)

Simplify access, strengthen security, and reduce password-related admin.

Risk insights

Identify emerging risks with real-time visibility and proactive alerts.

Integrations and API

Connect Sign In App with your SIS and existing systems to automate workflows and keep data in sync.

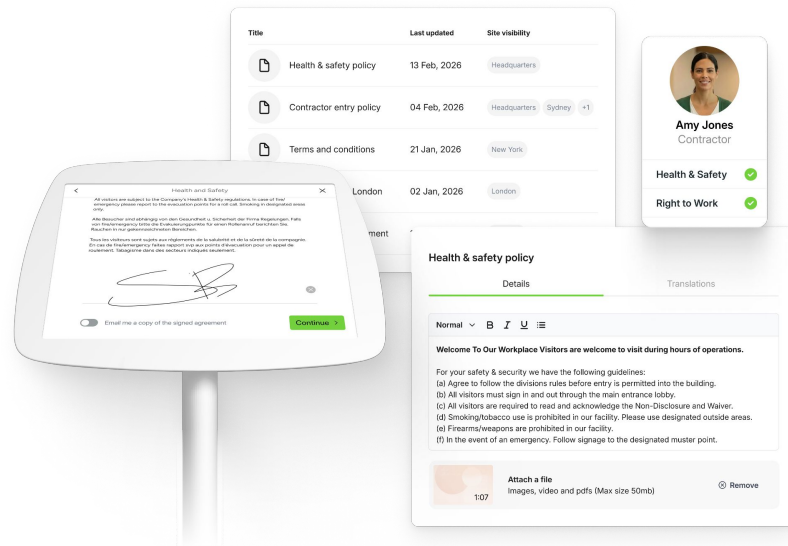

Data privacy controls

Protect sensitive information with flexible privacy, consent, and data retention controls.

Onboarding & credentials

Simplify onboarding. Stay compliant from day one.

- **Digital onboarding**
 - Guide staff, contractors, volunteers, substitute teachers, and visitors through role-based onboarding before they arrive.
- **Policy & documents**
 - Collect acknowledgements, district policies, and required documents with fully tracked, audit-ready records.
- **Credential & certification tracking**
 - Track licenses, certifications, background checks, and training with automated renewal reminders.
- **Approvals & integrations**
 - Automate approval workflows and connect with your SIS, Microsoft Entra ID, Google Workspace, and other school systems.
- **Compliance reporting**
 - Maintain a complete audit trail of onboarding, credentials, approvals, and policy acknowledgements to support district compliance.

Reporting & analytics

Turn school data into actionable insights.

Compliance reporting

Maintain audit-ready records for visitors, campus incidents, and district compliance.

Flexible reporting & exports

Filter by campus, visitor type, date, or custom fields, then export exactly the data you need.

Analytics Assistant

Ask questions in plain language and uncover trends, patterns, and insights in seconds.

Operational insights

View visitor activity, student attendance events, campus activity, and evacuation data in one place.

Real-time dashboards

See who's on campus, monitor activity, and respond quickly with live visibility across your school.

Multi-campus reporting

Compare campuses, identify trends, and maintain visibility across your district.
